WHO I AM

Flutter Developer with experience building cross-platform mobile applications and scalable backend systems using Firebase, Node.js, and NestJS. Skilled in designing high-performance apps, integrating REST APIs and real-time databases. Experienced in managing app releases, updates, and store listings through Google Play Console and Apple App Store Connect, with multiple published apps live on the Play Store. Strong problem-solving abilities (246+ LeetCode problems, Top 10% globally) with experience in Git-based agile workflows.

TECHNICAL SKILLS

- **Languages:** Dart, Java, JavaScript, SQL
- **Mobile:** Flutter, Provider, Bloc, Firebase (Auth, Firestore, Realtime DB)
- **Deployment:** Google Play Console, App Store Connect, App Publishing & Release Management
- **Backend:** NestJS, Node.js, Express.js, REST API Design, JWT Authentication
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase Firestore, Prisma ORM
- **Tools:** Git, GitHub (PRs, issue tracking, code reviews)
- **Core Concepts:** OOP, Data Structures & Algorithms

EDUCATION

Bachelor Science

8/2021 - 8/2025

Gift University, Gujranwala

- Computer Science (BSCS) 3.3/4.0 CGPA

Intermediate

04/2018 - 05/2020

Superior Group of Colleges

- ICS

WORK EXPERIENCE

Backend Developer

11/2025 - 01/2026

Blockrithms.com

- Developed scalable RESTful APIs for a real estate project using NestJS, Node.js, and Prisma ORM. Implemented secure RBAC and PBAC systems while maintaining clean, modular architecture. Collaborated with an agile team using GitHub, managing pull requests, resolving issues, and optimizing backend performance.

Freelance Full-Stack Developer (Fiverr Level 1 Seller)

01/2025 - Present

Click Profile

- Worked directly with international clients from USA, Saudi Arabia, China, India, Bangladesh, and Malaysia to gather requirements and deliver custom mobile and web applications using Flutter, Firebase, Node.js, and NestJS. Built scalable solutions with end-to-end development from planning to deployment, ensuring clear communication, problem-solving, and timely delivery of high-quality applications.

PROJECTS

Legal Right Awareness — Final Year Project | [Live Demo](#)

Full-Stack Legal Services Platform

Built a mobile app on Flutter connecting clients with lawyers for faster legal assistance. Features include RAG-based AI chatbot for legal queries, personalized lawyer recommendations, real-time chat, and automated admin tools for request management. Handled end-to-end development across frontend and backend.

Food Delivery Platform — Multi-Role Mobile Application

Developed app in Flutter with dual user roles (Customer & Driver), enabling real-time order placement, geofencing-based driver matching within 10km, integrated payments, live chat, and turn-by-turn navigation with order tracking.

Live Trading Application — Gold & Silver Market Tracker | [Play Store](#)

Created a real-time trading application on Flutter delivering live gold and silver rates through VPS WebSocket APIs, featuring diverse product listings and successfully deployed on the Google Play Store for seamless market tracking.

OliRianPredicts — Fortune Teller App (Flutter, Firebase, In-App Purchase) | [Play Store](#)

Developed and published a cross-platform mobile app that lets users ask personalized or pre-made questions to a fortune teller and receive answers within 1-5 business days. Implemented Firebase Authentication (Email, Google, Facebook), Firestore for real-time question tracking, an admin dashboard for managing and responding to user queries, and in-app purchases (Google Play Billing) for premium question packs. Published on Google Play Console - app reviewed and approved, now live on the Play Store.

MyPrayerWorks — Faith Community App (Flutter, Firebase) | [Play Store](#)

Developed a cross-platform faith-based social app connecting users through prayer, testimonies, and inspirational posts. Built the complete mobile application with a responsive UI, optimized performance across Android and iOS, and resolved platform-specific issues before publishing on the Google Play Store, where it's now live.

SyncSphere — Event Planning Hub (Flutter, Local Storage)

Built a collaborative event planning app enabling users to create events, manage guests, track budgets, and monitor timelines through a scalable interface. Implemented a design token system, local data persistence, clean architecture, reusable components, and widget testing for long-term maintainability.

Korva — Home Services Marketplace (Flutter, Firebase, Google Maps)

Developed a dual-sided marketplace connecting customers with local service professionals (plumbing, electrical, cleaning, and more) from a Figma design. Implemented Firebase Authentication, Firestore, Cloud Messaging, real-time chat, push notifications, job tracking, and an admin panel for managing users and approvals.

PlayConnect — Sports Networking App (Flutter, Node.js, Express.js, PostgreSQL)

Built an MVP connecting sports partners within organizations, with profile creation, availability settings, and player discovery filtered by sport and organization. Integrated a secure Node.js/Express backend with JWT authentication and native WhatsApp deep-link connectivity.

SchoolID Collect — Student ID Card App (Flutter) | [Android](#)

Developed an offline Android app that lets parents generate professional student ID cards through a guided multi-step form with photo upload, template-based rendering, and preview. Enabled direct sharing via Email and WhatsApp, with all processing done on-device for full data privacy.

AI-Powered Travel Platform — Japan Trip Planning & Booking Application | [Live Demo](#)

Built an AI-powered travel companion for Japan on Flutter that offers personalized trip planning, flight and hotel bookings, and intelligent recommendations via GPT-4 integration, complete with SOS alerts and real-time transportation guidance across major cities.

ACHIEVEMENTS & INTERESTS

- **Problem Solving:** 246+ LeetCode solutions (Top 10% global ranking)
